

The 18th IEEE International Conference on Scalable Computing and Communications (ScalCom 2018)

October 8-12, 2018, Guangzhou, China

IMPORTANT DATES

Workshop Proposal Due:	April 8, 2018 (Closed)
Proposal Notification:	Within two weeks after submission
Paper Submission Deadline:	May 15, 2018 (Extended Firm Deadline)
Author Notification Date:	June 25, 2018
Camera-ready Deadline:	August 8, 2018

ORGANIZING COMMITTEE

Honorary Chair

Didier EL Baz, *LAAS-CNRS*, France

General Chairs

Nong Xiao, *Sun Yat-Sen University*, China

Massimo Villari, *University of Messina*, Italy

Nikos Tziritas, *Chinese Academy of Sciences*, China

Program Chairs

Frederic Loulergue, *Northern Arizona University*, USA

Yuhui Deng, *Jinan University*, China

Burak Kantarci, *University of Ottawa*, Canada

Workshop Chairs

Kuan-Ching Li, *Providence University*, Taiwan

Wenyin Yang, *Foshan University*, China

Executive General Chair

Guojun Wang, *Guangzhou University*, China

Publicity Chairs

Scott Fowler, *Linkoping University*, Sweden

Wenbin Jiang, *Huazhong University of Science and Technology*, China

Xiaokang Wang, *St. Francis Xavier University*, Canada

Web Chair

Xueyan Zhang, *Central South University*, China

Registration Chairs

Xiaofei Xing, *Guangzhou University*, China

Pin Liu, *Central South University*, China

Local Organizing Committee Chair

Jianer Chen, *Guangzhou University*, China

Steering Committee Chairs

Laurence T. Yang, *St. Francis Xavier Univ.*, Canada

Albert Y. Zomaya, *University of Sydney*, Australia

WORKSHOPS AND SPECIAL SESSIONS

We invite proposals for workshops associated with the conference, addressing research areas related to the conference. Accepted workshop papers will be included in the proceedings published by IEEE. Send your proposals to:

ieeescalcom2018@googlegroups.com

PAPER SUBMISSION

Main conference papers are limited to 8 pages (full papers), or 6 pages (short papers), following the IEEE proceedings format, and are to be submitted as PDF via the ScalCom 2018 submission site: <https://easychair.org/conferences/?conf=scalcom2018>.

PAPER PUBLICATION

Accepted conference papers will be published by IEEE (IEEE-DL and EI indexed). At least one author of each accepted paper is required to register and present their work at the conference; otherwise the paper will not be included in the proceedings. Best papers will be awarded at the conference and invited to submit an extended version of the paper in a special issue of an ISI and Scopus indexed journal. Selected papers, after further extensions and revisions, will also be recommended to special issues. More details at: <http://www.smart-world.org/2018/scalcom/>

Towards Scalable Computing Systems and Networks

Nowadays, parallel architectures are ubiquitous and the arena of computing and communicating devices is quickly reaching an unprecedented scale. The trend is to keep increasing both the number of cores in a single device as well as the number of communicating devices. In this massively parallel and heterogeneous context, the need for scalable computing is everywhere and scalability is rapidly becoming a central aspect of computing.

The 18th IEEE International Conference on Scalable Computing and Communications (ScalCom 2018) will provide a forum for researchers willing to present their original work on scalable parallel and distributed computing. ScalCom 2018 will offer a unique opportunity to exchange ideas at the highest technical level related to communication networks, performance analysis and distributed applications with particular emphasis on scalability.

We invite submissions of high-quality research papers describing fully developed results or on-going foundational and applied work relating to all aspects of scalable computing and communications. The program committee will interpret it very broadly; everything from engineering principles to practical experiences on different levels of a parallel and distributed system including High Performance Computing (HPC), massively parallel systems and heterogeneous computing. We particularly encourage submissions on topics of emerging interest in the research and development communities. The topics of the 18th IEEE International Conference on Scalable Computing and Communications include, but are not

Cloud and Fog Computing

- X as a Service, where X includes backend, business process, database, infrastructure, network, platform, security, software, and storage
- performance, dependability, and service level agreements
- cloud programming models and tools
- fog computing algorithms and infrastructures

Tools for Big Data

- statistical data mining
- extreme big data
- Hadoop
- convergence of IoT, cloud and big data

Extreme Scale, Multicore, GPU Accelerators and Novel Architectures for Scalability-Rethinking

- parallel programming models and tools
- GPU, MIC, and FPGA based parallel systems, heterogenous platforms
- extreme scale systems and applications
- peta-scale and exa-scale workloads
- high-performance and high-throughput computing
- fault-tolerance in large scale applications
- near-data processing and data-centric approaches

Modelling and Simulation of Large Complex Systems

- cellular automata, genetic algorithms, neural networks, swarm Intelligence implementations
- integrated approach to optimization and simulation
- high-performance software developed to solve sciences (e.g. biological, physical, and social), engineering, medicine, and humanities problems

Mobile, Wireless and Pervasive Computing

- queueing theory, design and performance analysis of communication networks
- communication protocols of IoT
- distributed applications with emphasis on scalability, distributed applications deployment
- pervasive computing, distributed robotics
- convergence of communication and computing
