The 3rd IEEE International Conference on Smart City Innovations (SCI 2019)

19-23 August, 2019

Leicester, UK

http://www.smart-world.org/2019/sci/

IEEE Smart City Innovations (IEEE SCI 2019) will provide a unique platform for multi-disciplinary researchers, industry solution vendors and government agencies to exchange innovative ideas, challenges, research results and solutions. Posters and Demos that describe original and unpublished research relating to Smart City Innovations are welcomed.

SUBMISSION GUIDELINES

For posters, authors must submit a paper relating to their research. Each submission will be submitted as a short paper (up to 4 pages), describing the related research work, in addition to the relevance and importance of the work to theme of the Conference. All submissions will be peer reviewed. If accepted, the poster paper will be published in the proceedings of the conference. The authors of selected posters will be allotted short speaking slots to present their work at a dedicated Poster Session. The authors will also present their posters and talk one-on-one with the attendees in the poster exhibition session.

Proposals for Demos related to research in Smart Cities are also welcome. A demo presentation will normally be 30-minutes long and will consist of a live demonstration supplemented by a narrative. Authors will be given the opportunity to present their demos to a wide audience in a dedicated demo session.

Authors are requested to submit original, unpublished manuscripts. Submissions should follow the main conference Paper Submission Guidelines.
